It is not strange that the southern colancestors were for ages ensured in had no rights whatever, even to their own persons. Therefore all they could gain was through treachery and deceit, and it is only natural that these traits and it is only matural that these traits bred by slavery remain as inherited char-acteristics, now that the negro enjoys the blessings of freedom. It may take several generations before their habit of stealing will be unlearned, for even when the colored man becomes religious his easily besetting sin will be most of-ten found in his not respecting the prop-erty rights of others. And thereby hangs a take.

NOVEL READING.

A writer in a monthly review, dis-ensaing Mr. Balfour's "Foundations of Belief," takes occasion to say that solid books, dealing with the great problems of mind and morals, are no longer read except by a few specialists. That an ex-clusive diet of novel reading is extreme-ly debilitating is proved by one series of facts which are observable in every part of the civilized world. RETURN OF MODJEAKA.

NEW YORK, Aug. 21.-Mme felena Modjeska arrived tonight on the steamship Havel. Her husband, Count Bozenta, was with her. Mme. Modjeska left this country a year ago to revisit her home in Poland. She acted in various cities there for two months, and then prepared to fill an en gagement in St. Petersburg, hav-ing received permission from the Government to open a theater

There were heavy advance sales of seats, and the season was to begin April 15th. "Without any warning whatever," said Mme. Modjeska, "I received notice from the Government that I must not go on. I had to cancel the engagement. I tried to find out why the full to my Valc's Hair Tonic. Government of finds are made at the first and only remedy leaves. Purely Vegetable. "I may remain in this country permanently. I have a ranch near Los Angeles, California. For the present we shall stay two or three days at the Hotel Imperial and then go on to Chicago to visit my son."

Mme. Modjeska sprained her ankle on shipboard, but it is well now. "Clyde Fitch," she added, Having resumed business and taken advantage of the past two weeks to renovate our studio we are better prepared than ever to fill orders for views of ancient Hawaii and, of the stirring events of the late troubles. KRAJEWSKI CANE CRUSHER

We beg to draw the planters attention to this machine for which we claim the following advantages:

THE CRUSHER will cut the cane transversely in pieces about 3 inches long and extract about 50 per cent, of the juice and deliver the crushed cane in a utiform layer to the 3 roller mill, thereby causing a perfect feed and increased extraction of juice.

THE CRUSHER will leave the "skin" on the cane, thereby giving the juice a better chance to be expelled than if the cane was ripped open subjecting the pulp to the hard packing on the returner bar of the 3 roller mill.

THE CRUSHER will save labor in handling of the cane, as an irregular distribution of cane on the carrier will not materially effect the regular and even feed to the 3 roller mill.

THE CRUSHER will not require additional steam or boiler power, as it has

Experts say that the chain of a bley-cle, if the wheel is ridden hard, should be taken out and boiled in lard twice a CHAS. SEYDONE week, otherwise once a month. The wheel should be kept clean and oiled; wheel should be kept clean and oiled; the bearings taken out and cleaned in benzine, unless, on applying one's car to the place, a tiny click of the overlap-ping balls can be heard. The bearings get full of sand and the grease in which the balls are imbedded dries. There are many things requiring attention, and all wheels should be looked at carefully be-fore starting out. Power Is Colled Springs.

Inventor Edison says it would be comparatively easy to apply colled springs to bicycles as accumulators and distributors of energy. "The device could be so arranged that when riding down hill, or even on a level, the rider could at will throw the spring into gear and by degrees wind it up to its limit. Then when a hill was to be climbed or the rider vished to stop working for a short distance on the lovel he could turn on the power and let the spring give back some of the energy stored up in it. The spring could be wound up gradually, so as not to make pedaling much heavier when on a level and should, I think, be of sufficient power to carry a rider 1,000 feet or so on a good road with no up grade without his doing any work."—American Cyclist.

General Lew Wallace believes that the future of the bicycle depends on the women riders. "If the use of wheels were confined to men," he says, "the fad might spend itself in a season, but when the women take hold of the bicycle its future is secure." He also approves of bloomers, "about which there is nothing immodest, it being merely their present oddity of appearance that now excites comment. Why, in Tyrol women wear skirts coming just below the knees, and no one, not even an entire stranger, looks askance." But Her Skirts Weren't There

What One Wheelwoman Wanted What One Wheelwoman Wanted.

The other day, according to a vera clous reporter, a woman rode down one of New York's asphalt streets shricking. "Help! Help!"
